**Do you have thick, yellow discolored toenails? Are you embarrassed to wear open toed sandals in public?**

**Chances are you have fungal toe nails, a condition also known as onychomycosis.**

Stop suffering the pain and embarrassment of unsightly nail fungus.

Laser treatment is an easy and convenient procedure that helps turns your discolored and disfigured nails into clear, healthier looking nails.

This in-office procedure is painless and takes 3 treatments each lasting 30 minutes to complete.

Please schedule a consultation to determine if Laser therapy is right for you.
